COMPARATIVE VALUES

The question of "What should I buy that will go up in value the fastest?" is constantly being asked. The answer will vary according to the series that becomes popular at that time. However, on a long term basis, we have found that coins or currency which are inherently undervalued eventually rise to their proportionate value. Sometimes this will occur in a year, sometimes several years will elapse before it is recognized and the additional demand brings it up to its proper ratio.

For instance, prior to the 1981 edition of Friedberg's U.S. Currency book, many of the fractional currency were valued at two or three times the very fine price for uncirculated. Now, the uncirculated is four to six times what the values are for very fine. In our opinion, they are still undervalued in uncirculated, compared to very fine. The ratio in values for uncirculated is much more for large size currency and U.S. coins, and now that the fractional currency has become more popular, it is in the process of "catching up."

For awhile, half cents and large cents did not have the demand that the later Indian and Lincoln cents had. Therefore, they only had a nominal rise in value for some years. Now that they are again in demand, we note they are "catching up" with the more modern series. In addition, we note that the higher grades are advancing more rapidly than the lower grades, as occurred in the later series. Again, we believe they have still more "catching up" to do before they rise to their proportionate values.

The publication of Don's book, "Private Gold Coins and Patterns of the United States" will no doubt attract new collectors in this historical series, as has occurred with the publication of books in other areas. The increased demand should then force the series to increase in value to the new supply and demand ratio.

Careful studies of the entire gamut of United States, foreign, and ancient coins and currency would no doubt turn up many examples of "undervalued" series. Those who do their homework should reap rewards for the time devoted.

HOW TO BID

What to Bid On:

As you read through the catalog for the first time, record the numbers of all the lots you are interested in on a worksheet. If you are interested in specific types of coins, be sure to check the catalog index.

How Much To Bid:

The price you bid is determined by you. You must remember the value that you place on the coins. Check the descriptions in the catalog and decide what you are willing to pay. You should bid generously on the lots you strongly wish to obtain. If there are some lots you would like to have 'if the price is right', then you may want to place nominal bids on those lots. Because a number of collectors choose to bid on many lots, the number of successful bids will be relatively small. This is controlled by a very active market. **You can safely extend your bidding** (and take advantage of a 'bargain') by placing a dollar total limit on your bids. Should your total be reached before all your bids are executed, we will then terminate your bidding.

Remember that your bids are limits. It is possible, and quite often does occur, that you will succeed in purchasing a lot for less than your bid since we start the floor bidding at about 5-10% above the second highest mail bid. Example: You bid \$500.00 on the lot and the next highest mail bid is \$400.00; we start the lot bid at \$425.00. If there are no bids from the floor, you will then be awarded the lot at \$425.00 - or if the floor bidding stops at perhaps \$450.00 or \$475.00 then you will receive the lot at a small advance above the top floor bid. If bidding continues above the \$500.00, then that floor bidder will be awarded the lot.

How to Fill Out the Bid Sheet

On the Bid Sheet you will observe that there are two different column headings: Lot and Bid. When you decide on which lots you want to bid, enter the lot numbers under the proper column and the maximum amounts you are willing to pay for those lots in the proper column.

LOT	BID	LOT	BID
482	550.00		
517	900.00		
614	130.00		

If you have circled one of the increase percentages, you will be allowing us to increase your maximum bid in order to obtain the lot which is going for more than you had anticipated. We will buy the lots for you as low as possible as outlined in the TERMS OF THE SALE.

GRADING STANDARDS

Coins Kagin's uses strict ANA grading standards in addition to Dr. Sheldon's for the lower grades (Fair-2 & Poor-1).

MS-70 (Perfect Uncirculated) - Once in a great while a perfect coin is sold.

MS-67 (Gem Uncirculated) - No bag marks, hairlines, or other evidence of handling or contact with other coins.

MS-65 (Choice Uncirculated) - Fully struck with only a bare minimum of minor abrasions.

MS-63 (Select Uncirculated) - Nicely struck with fewer than usual bag marks, nice luster.

MS-60 (Uncirculated) - Strictly uncirculated with no evidence of wear, only a moderate number of bag marks on surfaces.

AU-55 (Choice About Uncirculated) - Bare traces of friction at the highest points.

AU-50 (About Uncirculated) - Traces of wear on many of the highest points.

EF-45 (Choice Extremely Fine) - Light overall wear on highest points, all design details very sharp.

EF-40 (Extremely Fine) - Slightly more wear than EF-45, still with excellent overall sharpness.

VF-30 (Choice Very Fine) - Light even wear on the surface, design details on the highest points lightly worn, sharp lettering and major features.

VF-20 (Very Fine) - As preceding, but with moderate wear on highest parts.

F-12 (Fine) - Moderate to considerable even wear.

VG-8 (Very Good) - Well worn, most fine details worn nearly smooth.

G-4 (Good) - Heavily worn, major designs visible, but with faintness in areas, without center detail.

AG-3 (About Good) - Very heavily worn with portions of lettering, date, and legends being worn smooth, date barely readable.

Fair-2 - Showing very little detail.

Poor-1 - Barely recognizable as to type.

Currency

Superb Gem CU (Superb Gem Crisp Uncirculated) - A flawless note. Perfectly centered with sharp corners. Full brightness and absolutely no handling or other impairments. Wider than usual margins.

GEM CU (Gem Crisp Uncirculated) - Bright and well centered. Full original crispness with no handling or aging. A virtually flawless note.

Choice CU (Choice Crisp Uncirculated) - Flawless appearance. Close examination might reveal teller handling, minute pinholes, or very light aging. A note with an excess of the above mentioned defects would not be considered Choice.

CU (Crisp Uncirculated) - No folds or corner creases. May have obvious aging, rounded corners, handling marks, pinholes, or other flaws that indicate mishandling. A note that does not retain full crispness or appears starched should be examined for processed or pressed-out folds.

AU (About Uncirculated) - The criteria for this grade is basically the same as for Uncirculated but a note may have a single fold or several small corner creases.

EF (Extremely Fine) - Two or three creases evident. The note should be bright and retain nearly full crispness.

VF (Very Fine) - Notes in this grade show obvious use. May have several folds and have started to lose some of its original crispness. Light soiling due to normal handling is accepted. Heavy soiling and excessive handling or loss of crispness is not acceptable in this grade.

F (Fine) - Very little original crispness evident. It should still exhibit its original brightness but will show much handling and soiling.

VG (Very Good) - May be soiled and well worn. All engraved features clear and complete. Margins must be intact.

G (Good) - Heavily soiled with no original color or body. May have frayed margins and small tears. Engraved features will be visible but no bold.

LARGE CENTS

238. 1793 S-11b **WREATH**, Rarity-5 (*VERY RARE*), **LETTERED EDGE**, **TWO LEAVES** VF-25, all details sharp, lt. edge bumps around rev. edge. Many times rarer than single leaf variety. We note "Condition Census" includes a VF-20 specimen.
239. 1794 "Head of 1793", S-19b, R-5 (*RARE*), Basically about sharpness of **Fine-12** overall but porous planchet. Devices and legends clear except "94" in date is not completely visible. *PLATE*

Liberty Cap Cents 1794-1796

240. 1794 **LIBERTY CAP**, "Head of 1794", VF-20 obv., bust & *LIBERTY* bold & well defined (4 in date trifle weak). Reverse close to **Fine-12** although portions of legend detail at right not completely visible.
241. 1794 S-58, **Wide Date**, **EF** sharpness but rough surface. Rarity 3. Probably worth VF trends of 575. *PLATE*

242. 1795 S-78, **Plain Edge**, **ONE CENT** central, **Sharp EF-45+ /AU-50**, nice chocolate color, usual slightly porous surface, spot before nose, a few old light marks but overall an appealing cent. Scarcer than usual 1795 variety. Nice for type "Liberty Cap". We note AU "Liberty Caps" ("common" varieties) now bring around 2,500; this worth?

CHOICE 1799/8 CENT

249. 1799/8 Sharp VF-30, Sharp Well-Centered with clear well defined detail. Perhaps among the sharpest we have seen! Close examination with glass reveals some faint brush marks but nothing of any distracting significance. It should surely qualify for the "**CONDITION-CENSUS**" specimen for which acquired. Lovely chocolate-steel color with remarkably sharp date and *LIBERTY*. The **RAREST DATE LARGE CENT AND ONE OF THE MOST DIFFICULT TO OBTAIN IN RESPECTABLE CONDITION!** Unlisted in both *Red Book* and *Trends with valuations above VF-20* surely this remarkable specimen should realize a substantial four figure bid.

250. 1800/179 S-192, Nice chocolate brown color, sharp 79 in overdate. Minor surface & rim marks obv.; nice clean surface rev. *From the 11/60 Edward H. Schwartz Sale and described as follows: "S192 (D141, CN3). Compact overdate both points of overcut 7 show; long fraction bar slanting down to right. VF-25, rarity 4."* Undoubtedly "Condition Census" as Dr. Sheldon includes VF-20 in his CC listing.

HALF DOLLARS

Flowing Hair Type, 1794-1795

An extensive collection of die varieties offering an unusual opportunity to obtain some seldom available rarities. We note an increased interest which we believe will be reflected in active bidding. It is our understanding that a revised edition of Overton's book is being contemplated.

839. 1794 FLOWING HAIR, O-105, R-6 (*Ext. Rare*), **About Very Good**, however struck from dished dies resulting rt. stars weaker than left and eagle worn to the point of visibility only at outer portions. Rare early type.

840. 1795 O-107a, R-6 (*Ext. Rare*), Shattered rev. die, **VG** with some portions closer to *Fine*, a few stars faint at right.

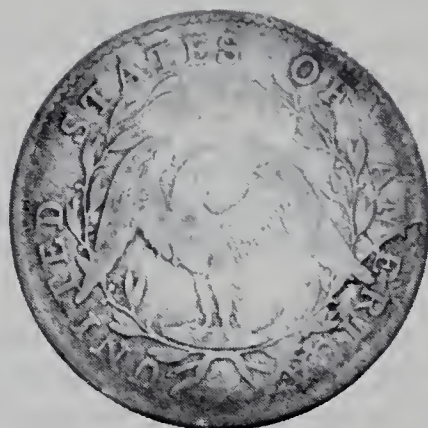

841. 1795 FLOWING HAIR, O-108, R-5, Obverse **Fine-12**, bust hairline detail well defined. Reverse grades closer to **VG8**, usual flatness on eagle's breast and wings. Overall nice clean surfaces with no major marks or abrasions.

HALF DOLLARS

842. 1795 O-122, R-5, (VERY RARE), Sharp VG obv., Fine rev. Popular two year type.

843. 1795 **FLOWING HAIR**, Sm. Hd. Variety, O-126, R-5 (Very Rare), Close to VG-8 overall with bust outline clear, well defined and ear detail beginning to emerge. Date and legends sharp, portions of eagle's wing feathers show a little. Relatively clean surfaces with exception of tiny edge bump at rt.

Draped Bust, Heraldic Eagle Halves, 1801-1807

844. 1801 O-101, R-4 (Very Rare), EF-40, Usual strike from dished dies resulting in some weakness in strike on top hair strands and stars but sharp rev. Exceptionally well struck reverse with sharp bold feather detail. Usual weakness noted in 2 top stars below clouds due to die failure. *Rare* date in higher grades.

THINKING OF SELLING?

We hold auctions year round and are always looking for top quality material or entire collections. We also offer outright cash purchase if you desire. Call TOLL FREE 800-247-5335.

845. 1802 O-101, R-4 (Very Rare), Sharp EF-45, Top hair strands of bust much sharper in detail than most seen, as are the center areas of reverse. Seldom offered this choice. Rare in this grade as a date.

1805/4 SHATTERED DIE, FINEST KNOWN?

846. From our 9/72 auction sale, described as follows: "1805 OVER 4, variety O-103a, **WIDE OVERDATE**, prominent die break nose to edge and **SPECTACULAR TRIANGULAR BREAK ENCOMPASSING FIRST 2 STARS TO HAIR**. A **FANTASTIC SPECIMEN--Choice AU-50-55** (uneven friction due to severe die failure?) Lovely bluish golden luster. Die break across bust connecting above 2 breaks, stars struck up about 50% rather than being nearly flat as characteristic of most of the few known specimens. **RARITY 7 (EXCESSIVELY RARE)**! Overton lists this single die combination in 3 different die states (103, 103a, 103b) and gives each a Rarity 7 rating, *Scott lists 2 "TYPES" 1805 OVER 4; Close Date & Wide Date* and under Wide Date states "Almost R7" which we interpret to mean 13 to 15 total known of this "TYPE" (total of overton 103, 103a, 103b).

THUS, THIS IS AMONG THE TOP RARITIES OF THE MAJOR VARIETIES OF THE ENTIRE HALF DOLLAR SERIES! It takes its place among the illustrious company of 1817 Over 14, 1838-O, 1847 Over 46. The Overton plate coins of 103a and 103b (none for 103) are Very Good and Good respectively. Scott Catalogue states "**UNKNOWN IN UNC., EXTREMELY RARE ABOVE FINE.**" Scott Catalogues values this **MAJOR VARIETY** at over 4 times that for the 1805 Over 4 close date "Type" in Very Fine; but of course no comparison can be made for the higher conditions since this "Type" is not known uncirculated and is so much more rare comparatively for over Very Fine condition.

This specimen was acquired 1964 as "RARE CRACKED DIE, BEST KNOWN?" at \$1,700.00. We are inclined to believe that this Fantastic Specimen is indeed "**THE FINEST KNOWN.**" When it is eventually included in the Guidebook as a Major Variety, we believe it will rise to a value closer to that of the 1817 over 14."

847. 1805/4 Wide Overdate, O-103a, R-7, Very Good-8, Balanced wear although some letters of *LIBERTY* not completely full. Same variety as O-103 except for triangular break at stars 1 & 2. Scott states "Unknown in unc., and extremely rare above fine."

AVOID ERRORS — Recheck your Bid Sheet carefully!

HALF DOLLARS

848. 1805 O-109, R-3 (Rare), 4 berries, AU-50, Traces of luster, usual softness in strike in back hair strands and top stars reverse due to die failure. High Wire Edge both sides. Scott states "Extremely rare in unc."

849. 1806/5, O-101, R-3 (Rare), small stars obverse, typical soft struck top back hair and shoulder of bust (also opposite — top right stars rev.) Probably EF but the striking characteristics give it the appearance of a Strong VF-30.
850. 1806/5 O-101, R-3, VF-30, Nice sharp surfaces, a touch of gold gray toning. Desirable early die state.

851. 1806 Over 5, O-102, R-3 (Rare), EF-40 with flat stars typical of this variety.
852. 1806/5 O-103, R-2, VG-8, Sharp date, rim slightly worn into LIBERTY at top.

Rare "Emergency Overdate" 1806/5

853. **1806/5, Overton 104a, R-6 (EXT. RARE!)** Ex: our ANA Sale lot 1406 described by Walter Breen as: "*Underlying 5 clear in bottom of 6*" unlike "common" 1806/5 showing only at corner. Heavy crack last three stars; break at U. Difficult to grade, this has some details **Extremely Fine** or better, many others weaker, believed largely as struck; traces of *mint luster*, peripheral dark tone helping heal signs of old cleaning; minute bag marks. The variety is of great interest; like the 1806/5 25¢ and \$2½, but apparently no other obvs. in the series of overdates. The die began life as an 1805 production actually used for making coins of 1805 (O-105). Normal overdates are from dies not used with their original dates; these three 1806/5 exceptions are thought to have represented some kind of emergency in 1806. Rarity of this 50¢, like the \$2½, is attributed to early die breakage. *Seldom offered*, especially with the advanced die breaks, and usually in low grade; "Gilhousen" 879, for instance, was only Fine. This Rarity in "CONDITION CENSUS" surely now worth several thousand dollars.

854. **1806 Knobbed 6, O-105, R-2, VF-20**, A few minor field abrasions obv., portions of star area on rev. weak.

855. **1806 Pt. 6, Stem not through claw, O-109, Fine-12**, Even wear, some lt. surface marks.

856. **1806/9 O-111a, R-5 (VERY RARE), AU-50**, Unlisted die state struck before the heavy rim break developed at *TED*. Much original mint luster with lovely iridescent toning. The Extremely Rare early die state with less weakness in back hair, collar and point of bust than usually seen. *Sharper overall to the Overton Plate coin!* A well known rarity in any die state and in any grade and *one of the two most popular blundered dies in half dollar series*; the other being 1846/horizontal 6. **CONDITION CENSUS!** We have yet to see a strictly uncirculated specimen.
857. **1806 O-120, R-4, VF-20**, Nice surface overall with exception of tiny rim ding on reverse.
858. **1806 O-120a, R-6 (Ext. Rare), VF-25**, Attractive clean surfaces, motto, legends and stars above eagle are quite sharp. Rare sub variety with early stage of shield break. **PLATE**
859. **1806 O-120a, R-6, Sharp Fine-15**, Center portion of bust trifle weak, nice clear surface. Extremely Rare sub variety with flake type shield die break.
860. **1806/5 Knobbed 6, R-3, Obverse Sharp Fine-15** bordering on **VF-20**; reverse basically a strong **F-12** except for flatness in eagle's right wing and clouds above.

HALF DOLLARS

861. 1807 Bust Right, O-105, Borderline Unc-55+ , Lovely blue and sea-green luster, nice strike with full edge dentilations both sides. While some of the hair strands are not fully struck up, they are sharper than most seen over the years. Only a faint rub spot on eagle's head (high point of coin) restrains our use of further desirable adjectives. Lovely surfaces. It would be difficult to obtain a more choice specimen. Must be seen to be appreciated!

862. 1807 O-105, Choice AU-50, Rare early die state without die lump after S. Much original luster.

863. 1807 Bust Right, O-107, R-7 (EXTREMELY RARE!), Choice AU-50, Lovely bluish golden toning and a "touch" of sea-green iridescence. Probably THE FINEST with only slight weakness. Much sharper strike of eagle's head (those seen of the few known are much weaker.) Stars and clouds on reverse are exceptionally well struck! Planchet streak (in original strip?) near I and S in STATES. *By far, the rarest of the 1807's! Unknown to Haseltine or Beistle!* There is no Overton Plate coin photo.

864. 1807 Bust Right, O-108, R-6, Sharp VG-10, Hairlines of bust not completely full at center. Surfaces relatively few of usual marks & abrasions.
865. 1807 Bust Right, O-109, R-6, Obverse close to VG-8; the reverse Sharp F-12 with devices & legends well defined.

HALF DOLLARS

1127. From our 9/78 GENA Sale and described as follows: "1837 **"BROAD MILL"** (31 mm diameter) fine over heavy (wide) reeding, a faint rub from the **"CHOICE UNC."** grading formerly given it, lovely antique gold & rose. Scott lists it **"R8?"** without any price. Acquired as **"EXTREMELY RARE"** at \$2,000. The sharp rise in values the last three years should result in a considerably higher price.
1128. 1838 **"HALF DOL."**, AU-50, Nice overall sharpness, usual rubbing, cleaned. A few mint equalization marks noted near top and bottom edge.
1129. 1838 AU-50, Much original luster still present and attractive grayish golden toning. Interesting die crack reverse from *D* in *UNITED* across shield through top left serif of *DOL*.
1130. 1838 **HALF DOL.**, Sharp EF-45 (short lived type) deeply toned. *Scarce*.

EXCESSIVELY RARE 1839 BUST SMALL LETTERS HALF DOLLAR

1133. From the November 1977 B & R Harte Sale, described as follows: "1839 Bust Type half dollar with *small letters* reverse (as usual on 1839-1841 Liberty seated coins.) This important coin traces its pedigree to our Scott Collection sale. It is presently unlisted in the **Guide Book** and other standard references!

The obverse is of the standard 1839 draped bust style. The reverse, however, does not employ the usual style found on this piece. Rather, it has the small-letters reverse as used with Liberty seated half dollars 1839-1841. Unlike the regular 1839 bust half dollar reverse, this 1839 has a smaller and more delicate eagle.

The coin is in Very Fine grade (with surface marks) and was apparently released into circulation to serve as a currency medium as opposed to having been struck as a pattern. So far as we know, the coin is absolutely unique!"

Since then two other specimens have been reported with rumors of a third. It is the rarest listed half dollar in the Guide Book with the possible exception of the 1853-O (3 known?). Exceeds in rarity the better known 1796, 1797, 1817/14, 1838-O, etc.

1839 No Drapery Half Dollar

Struck only a few months, this "type" elusive in the higher grades. The "Bust" and "Liberty Seated With Drapery" types were also struck early and later the same year.

1134. 1839 NO DRAPERY, Choice AU-55+ /MS-60, Lovely blends of steel-gray with gold overtones. *SHARP STRUCK WITH RAISED EDGES!* The vast majority that we have seen come weakly struck in the center. This is much sharper struck than usual. Near *full mint state* but close examination with glass reveals just a faint "whisper" of rubbing on breasts and knee. *Rare in top grades*, a "one year only type" and always in great demand.

Liberty Seated, No Motto Halves, 1839-1866

1135. 1840 Sm. Let., AU-50, Pale gray tone, fields relatively nice (no major marks).
 1136. 1841 EF-40 sharpness but has been cleaned resulting in numerous lt. marks & hairlines.

1138. 1843 AU-55/MS-60, Considerable mirror P.L. surface with raised edge. Close examination reveals that this specimen does not have all of the criteria of a "true" proof but was most likely original struck as a "First Strike" *Presentation Piece*. The obverse has been cleaned resulting in numerous lt. hairlines; the reverse is much nicer with attractive golden toning.
1139. 1844 AU-50, Attractive golden toned, hints of Semi-p.l. luster.
1140. 1844-O EF-40, *Blundered*, "Double Date" with first date out $\frac{1}{3}$ into base of Liberty, second date punched over first in correct position. Grayish toned, nice surface & detail. *Rare* piece listed in Scott as "R-6" (13-30 known), most in grades about good to fine. *PLATE*
1141. 1845-O AU-55, Near fully struck, traces of frost, considerable luster. Has been cleaned long ago but still a scarce coin in this higher grade.

\$50 PANAMA-PACIFIC, OCTAGONAL

1664. 1915 \$50 PAN-PACIFIC OCTAGONAL, Select Brilliant Uncirculated, MS-63, lovely original mint luster & color. Far superior to most we have seen over the years. Surprisingly free of the many rim nicks and dents prevalent among these 8 corner octagonals and unless closely examined with a glass one can hardly detect any discernable marks or hairlines. Should surely realize a strong mid five-figure price.

Some \$50 octagonals were struck at the fairgrounds on June 15, 1915. Since the equipment at the San Francisco Mint was not capable of striking \$50 coins, a special hydraulic press weighing 14 tons was brought in from Philadelphia for the occasion. In spite of the limited number struck, only 483 round and 645 octagonal were sold in 1915. The remainder ended up the "melting pot" as result of supply far exceeding demand! The issue price at that time was \$100 each which was a tidy sum of money for that era.

\$50 1915 PANAMA-PACIFIC, ROUND

1665. 1915 \$50 PAN-PACIFIC ROUND, Choice EF-40 overall with outer portions much closer to Uncirculated. Lovely color and luster. Close examination with glass reveals lt. rubbing on high points (Minerva's cheek and helmet obv.; owl's legs & wing rev.)

Huge 1976 National Bicentennial Gold Medal

1666. 1976, The first and only commemorative gold medal in the history of the United States to be specifically authorized by Congress for sale to the public! Only 423 Struck! Designed by chief engraver, Frank Gasparro, and struck at the San Francisco Mint. In original plush wooden box. The medal contains an unbelievable 13.18 troy oz of .900 fine gold!
- The issue price was \$4,000 which was a substantial premium over gold content at that time. However, the sharp rise in value of gold since 1976 resulted in a number of pieces ending up in the "melting pot." A previous offering from our Oct./79 Sale (two years ago) fetched \$8,000 when gold was considerably less. Present value ?

EXCESSIVELY RARE 1873 \$10 EAGLE PROOF

Coronet Type, With Motto, 1866-1907

2067. 1873 Select Brilliant **PROOF-63**, Exquisite yellow gold color somewhat cameo in appearance. Sharp *RAISED SQUARE EDGE* both sides! Lovely deep mirror surfaces, a few lt. hairlines and tiny nick in field above third star. Certainly far above average. *EXCESSIVELY RARE!* Mintage of only a mere 25 proofs plus 800 business strikes.

David Akers, in his excellent book on Eagles, sums up the rarity of this coin by the following comments: "*The 1873 is one of the five or six rarest dates in the series. Among Philadelphia Mint Liberty Head issues, only the 1875 is rarer. There are relatively few known specimens in any condition, perhaps 12-15 business strikes and only 7-8 proofs. The business strikes are all VF or EF (mostly VF) and I have never seen or heard of one that grades AU or uncirculated.*"
